This user manual has all the information you need to make the most out of your WIFI Doorbell. Please keep this manual for future reference and ensure you have read all safety instructions carefully before use.

The manual is subject to change without notice. The updates will be added into the new version of the manual.
What you’ll need

This is what you will need to set up your iPixo WIFI Doorbell

**WIFI Broadband**
A working internet connection on a 2.4Ghz frequency channel

**Phillips Bit**
A power drill with Phillips driver bit

**Screws (provided)**
To mount the doorbell on to the wall

**Compatible Device**
An Apple or Android Smartphone

**Drill Bit**
To install on surfaces such as brick or concrete

**Wall Plugs (provided)**
Required to install on to surfaces such as brick or concrete
Set up Doorbell

If you’re setting the Doorbell up for the first time, you will need to:

1. Download the Tosee app from the Google Play Store or Apple App Store
2. Open the app and follow the on-screen instructions to add the Doorbell on to the app.

You will be asked to connect to the Doorbell’s network, then enter your Wi-Fi router password for the Doorbell to be connected to the App.

If you need help with this, please refer to the Quick Start Guide included with the iPixo WIFI Doorbell.

You can also visit our online support section for additional help: https://www.ipixo.com/product-downloads/
Installation

We recommend that your install the WIFI Doorbell around 4 feet from the ground. This is the best height for the Doorbell’s field of view and motion detection range.

Before mounting the WIFI Doorbell, we recommend that you test the Wi-Fi strength in the area that you’d like to place it.

Hold the Doorbell in the position that you would like to mount it and check that the live stream is working well in the app.

Working well? Great, continue to the next page.

Can’t see the live stream? Your Wi-Fi may not be strong enough in that area, you may need to find another spot or move your Wi-Fi router closer.
Installation

Step 1
Mark screw holes where you would like to install the mounting bracket.

Step 2
Drill pilot holes. Use the included wall anchors if you’re drilling into stone or hard material.

Step 3
Install the mounting bracket on to the wall using the four screws. To attach the doorbell, simply slot it in and push it down into place.

Step 4
Finally, use the provided security screw to secure the doorbell on to the mounting bracket.
Live View

- Share Doorbell with friends and family
- Access Doorbell Settings
- See your WI-FI Signal Strength and Speed
- Click to activate or mute the speaker
- Access video recordings
- Change settings to best suit your outdoor environment
- View full screen
- Save a screenshot to your smartphone gallery
- Press to speak through the Doorbell
- Record live footage to your smartphone gallery
Motion Alerts

You will receive Motion alerts when the Doorbell detects movement – to adjust the sensitivity of the motion sensor, follow the steps below:

**Step 1**
Click on the Settings icon. You will be asked to enter the Doorbell password.

**Step 2**
Click “Motion Detection Sensitivity”.

**Step 3**
Adjust the sensitivity by dragging the bar across. The higher the sensitivity, the more alerts you will receive.

When movement is detected, you will receive an alert straight to your Smartphone. If your Smartphone is locked when motion has been detected, you will receive an alert on your home screen.
Accessing Playback

The Doorbell records footage when someone rings the doorbell and when movement is detected so you don’t need to remember to press record.

You can access the recordings by clicking on the “Playback” icon.

Click to record footage manually, this will save to your phone gallery.

Select a date.

Recording of movement detected.

Recording of someone ringing the Doorbell.
Sharing the Doorbell

You are able to share the Doorbell with friends or family so they can also answer calls and have access to recorded footage. They must also have the ToSee application downloaded on to their smartphones.

**Step 1**
Click on the Share icon. You will be asked to enter the Doorbell password.

**Step 2**
Click the + icon (Android users: click Share).

**Step 3**
Add a name or nickname of your friend or family member. Click Confirm.
Sharing the Doorbell

**Step 4**

A QR Code will appear on your phone. Your friend or family member simply has to scan the Code to gain access to the Doorbell.

Then click Confirm

**How to scan a QR Code**

**Step 1**

Click the + icon in the top right corner

Then click “Scan QR Code”

**Step 2**

Scan the QR Code ensuring the code fits within the square

**Step 3**

Give the Doorbell a name

Then click Confirm
Adding the Indoor Chime

The indoor Chime should be paired with the Doorbell prior to installing outdoors

**Step 1**
Plug the Indoor Chime in to a wall socket

**Step 2**
Press the Up or Down buttons on the Chime to choose your favourite ringtone

**Step 3**
Hold down the Volume button until the chime makes a ringing sound and flashes blue

**Step 4**
Immediately press the Doorbell button – the Chime will ring and the will again flash blue

**Step 5**
Press the Doorbell button again to ensure the Chime and Doorbell have paired successfully
Safety Information

These instructions are intended to ensure that user can use the doorbell correctly to avoid danger or property loss.

Only use the original power adapter and accessories from the manufacturer.

Do not connect several doorbells to one power source as adapter overload may cause over-heat or fire hazard.

Do not place the doorbell in extremely hot, cold, dusty or damp locations (the operating temperature should be -20°C ~ +55°C)

Do not drop the doorbell or subject it to physical shock. If you notice any smoke, odours or unusual noise coming from the doorbell, immediately unplug from power, and then contact iPixo customer services.

It is not permitted to open the doorbell yourself or to have it opened, neither is it permitted to repair the camera yourself or to have it repaired. This will void the warranty.

Disconnect the doorbell from all power sources before cleaning it. Use a clean, dry cloth to clean the product.

Do not use any abrasive agents, corrosive cleaning products or any substances that contain bleach or solvents to clean the doorbell.
